AZ CORP COMMISSION  
DOCKET CONTROL

Dear Chairman Gleason:

I am writing to ask that the ACC reject the Certificate of Environmental Compatibility for the Devers to Palo Verde 2 Transmission Line Project. This line would not be in the broader public interest. It would bring few benefits to Arizona and is likely to result in increased rates for Arizona citizens & voters while at the time doing significant environmental harm. The proposed line would represent an incompatible use of the KOFA National Wildlife Refuge and would negatively impact other sensitive public lands in our state.

The DVP2 is unnecessary to the Arizona electric supply. ACC needs to weigh the needs of Arizona and its citizens, especially Arizona utility consumers, above the desires of out-of-state utilities. Because of this, I ask you and the other commissioners to reject the Certificate of Environmental Compatibility for the Devers to Palo Verde 2 Transmission Line.

Sincerely,  
Patricia Kenyon
